DETAILED ACTION

1. This action is in response to the amendment filed 1/12/2009.
2. Claims 1, 6, 11, and 16-18 have been examined and are pending in the application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 17-18 are rejected under 35 U.S.C. 102(a) as being anticipated by Matsumoto U.S Patent No. 5,835,765.

As to claim 17, Matsumoto teaches a method of controlling the operation of an operating system in a computer system (Fig. 1), the method comprising:

automatically recognizing operation statuses of the computer system in which each operation status represents a process currently under execution (...The execution status monitoring means 14 monitors the execution status of the application programs by exchanging messages with the executing application programs. When an error occurs in one of the executing programs, the execution status monitoring means 14 notifies the controller executing the predefined error process..., lines 13-18 column 10);

creating a file for the process that indicates the operation status for the process (...records the error log to the log file 23..., line 40 column 10); and

Art Unit: 2194

automatically starting a job, determined based on the operation status (...When an error occurs, the computer resources manager 15 notifies the error recovery processor executing the predefined error recovery process, and the error communication means handling the predefined error notification process..., lines 22-26 column 10).

As to claim 18, Matsumoto further teaches the job is automatically executed in an operation status of the system after said operation status has been automatically recognized (...When an error occurs, the computer resources manager 15 notifies the error recovery processor executing the predefined error recovery process, and the error communication means handling the predefined error notification process..., lines 22-26 column 10).

Allowable Subject Matter

4. Claim 1, 6, 11, and 16 are allowed.

Response to Arguments

5. Applicant's arguments have been fully considered but are moot in view of the new ground(s) rejection.

Applicant's arguments presented issues which required the Examiner to further view the previous rejection. The Examiner conducted a further search regarding the issues mentioned in Applicant's response. Therefore, all arguments regarding the cited references of the previous rejection are moot in view of the new grounds of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andy Ho whose telephone number is (571) 272-3762. A voice mail service is also available for this number. The examiner can normally be reached on Monday – Friday, 8:30 am – 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng An can be reached on (571) 272-3756.
